Mobile App Development (Flutter)

WEEK 1 – Flutter & Dart Fundamentals (Beginner Level)

Focus: Understanding Dart basics and building the first Flutter app.

Topics Covered:

- Introduction to Mobile App Development & Flutter
- Flutter installation & setup (VS Code / Android Studio)
- Dart programming language basics (Variables, Loops, Functions, Classes)
- Flutter app structure: `main.dart`, Widgets, `MaterialApp`, `Scaffold`
- Stateless vs Stateful Widgets

Assignments:

1. Create a **“Hello Flutter”** app that displays your name and course.

2. Build a **Profile Card App** using basic widgets (Container, Row, Column, Image, Text).

Mini Project:

Personal Info App

- Create a static screen showing profile photo, name, skills, and contact info.
- Use proper widget alignment, colors, and responsive layout.

Outcome:

Understand Flutter project structure

Build UI using core widgets

Learn Dart syntax & fundamentals
